Reviewer Remarks

- All physical and chemical characteristics of Albendazole BP in DOC1 are confirmed by multiple reference documents and trained pharmaceutical data.
- All label and value discrepancies are cosmetic (e.g., 'Molecular Weights' plural in DOC5, pKa label spacing) and do not affect compliance.
- Storage condition in DOC1 (2-8°C) is stricter than BP 2022 requirement (below 30°C) and is acceptable.
- No substantive cross-document mismatches or regulatory risks identified.
- Reference document DOC5 uses 'Molecular Weights' (plural) — recommend harmonizing to 'Molecular Weight' (singular) for consistency.
- No action required for minor anomalies; dossier is ready for submission.
