Cross-Document Mismatches

Values in the API Summary that differ from reference documents or trained pharmaceutical knowledge.

Property	Document Value	Ref Doc	Ref Value	Trained Data	Impact
Structural Formula Image	Sulthiame structure image in DOC1	DOC4(Chem-Prop), DOC5(Phys-Chem)	No image or correct structure for Albendazole	PubChem CID:2082 — Albendazole structure (benzimidazole ring, propylthio side chain, methyl carbamate)	CRITICAL — Incorrect structure image in API Summary may mislead reviewers and is a substantive error.
Company Name Formatting	RHYDBURG PHARMACEUTICALS LTD.	DOC3(DOC3(QQ)), DOC8(Spec-API)	Rhydburg Pharmaceuticals Ltd	-	MINOR — Capitalization inconsistency in company name across documents.

Recommended Actions

CRITICAL **Action 1:** Incorrect structure image in API Summary (DOC1) — image is for Sulthiame, not Albendazole.
Error in: **DOC1** → "Sulthiame structure image"
Correct: "Albendazole structure (benzimidazole ring, propylthio side chain, methyl carbamate group)"
Supporting: PubChem CID:2082, BP 2022 Monograph, DOC4 (CHEM_PROPERTIES), DOC5 (PHYS_CHEM)
Action: **CORRECT**

Inconclusive Resolutions

 **Document Needed:** BP 2022 Monograph for Albendazole
Reason: No official pharmacopoeial monograph uploaded. Full verification of solubility, colour, melting point, MW, and formula relies on trained data only.
Affected (8): A5, B2, B3, K2, K3, K4, K5, L3

Reviewer Remarks

- The API Summary for Albendazole is generally well-aligned with reference documents and trained data for all critical identity, physicochemical, and pharmacological properties.
- **CRITICAL:** The structure image in DOC1 is for Sulthiame, not Albendazole. This is a substantive error and must be corrected before submission.
- **NON_COMPLIANT_ASSUMED:** No official BP/USP/EP monograph was uploaded. While all values match trained data, regulatory authorities may require the actual monograph for full verification.
- **MINOR:** Several cosmetic anomalies (e.g., 'Physiochemical', 'Molecular Weights', trailing period in ATC code, company name capitalization) are present but do not affect compliance.
- **REF DOC OBSERVATION:** Company name capitalization is inconsistent across documents (e.g., 'RHYDBURG PHARMACEUTICALS LTD.' vs 'Rhydburg Pharmaceuticals Ltd'). Recommend harmonizing for dossier professionalism.
- All arithmetic checks (MW, HAC) pass and are consistent with molecular formula and trained data.
- No evidence of hygroscopicity or odour issues; storage condition is stricter than BP 2022, which is acceptable.
- Recommend uploading the BP 2022 Monograph for Albendazole to enable full document-based compliance verification.
