Reviewer Remarks

- [OBSERVATION] Field label formatting and salt name in INN field are minor anomalies and do not affect regulatory compliance.
- [RECOMMENDATION] Harmonize ATC code assignment for FDCs to use the combination code (S01CA01) in all documents for regulatory consistency.

Executive Summary

The INN & ATQ Summary for Tobramycin and Dexamethasone Sodium Phosphate Ophthalmic Solution is largely compliant with reference documents and trained pharmaceutical data. All mandatory fields are present for both APIs, and cross-document

checks confirm the identity, quantity, and key characteristics. Minor anomalies are present in field label formatting and ATC code approach, but no critical data integrity issues were found. Harmonization of ATC code assignment for FDCs is recommended.
